Subject: Please Reconsider

I am a native Montanan, recreationist, and concerned citizen from missoula, and I feel that mining of any kind should be prevented from happening in Lost Horse Canyon.

The Canyon is extremely valued for camping, fishing, hunting, fishing, climbing, and general scenic beauty.

These places are becoming few and far between due to large scale developments in Ravali county, and this seems like an easy option for keeping some open space.

Please, Please reconsider this decision to mine this beautifull area! We need open space for the promising future of tourist economies, and preservation of our remaining open spaces.
